Use-Case Flow Specification

UC-03: Book Confidential Counseling Session | Corporate Mental Wellness & Counseling Platform

PES2UG24CS016 | Problem Statement 14 | Aug 2026

Use Case ID: UC-03	**Primary Actor:** Corporate Employee
Use Case Name: Book Confidential Counseling Session	**Secondary Actor:** Licensed Therapist
Supporting: Timezone Engine, Anonymization Service	**Priority / Freq:** High / High (on-demand)

This use case explains how an employee books a confidential session with a therapist. The employee searches for therapists, checks slots in local timezone, and confirms booking. Everything uses only pseudo-ID (EMP-XXXX) so real identity is hidden.

Preconditions: 1) Logged in via SSO 2) Pseudo-ID service working 3) Therapists availability updated

Postconditions: 1) Slot booked & saved 2) Meeting link + invite sent (pseudo-ID only) 3) No PII exposed

Trigger: Employee clicks Schedule Confidential Session on dashboard (or redirected after high stress score in UC-02).

Main Success Scenario

Step	What User Does	What System Does
1	Clicks Book Counseling Session	Starts flow and includes UC-01 (Generate Pseudo-ID)
2	Agrees to anonymous mode	Gives/verifies pseudo-ID like EMP-7F89X
3	Filters therapists (specialization, language)	Shows matching therapist profiles
4	Selects a therapist	Fetches slots and includes UC-08 (Validate Timezone)
5	Picks date & time slot	Locks slot for 5 min, shows summary with pseudo-ID
6	Confirms booking	Checks lock and saves booking in DB
7	-	Creates encrypted video meeting link (pseudo-ID)
8	-	Sends calendar invites to employee & therapist
9	-	Updates therapist availability
10	Sees confirmation page	Shows meeting link and calendar option. End.

Alternate & Exception Flows

Alternate Flow 5a - Slot already taken (conflict):

- 5a1. While selecting, someone else books the same slot.
- 5a2. System finds conflict during UC-08 and releases lock.
- 5a3. Shows: Sorry, this slot was just booked. Please choose another time.
- 5a4. Employee picks different slot, continue from Step 5.

Alternate Flow 8a - User cancels (extends UC-10):

- 8a1. At confirmation, employee clicks Cancel.
- 8a2. System calls extend UC-10 (Reschedule/Cancel Booking).
- 8a3. Releases 5-min lock, slot becomes available again.
- 8a4. Shows: Booking cancelled. Nothing was saved. End.

Exception Flow 2a - High stress alert (extends UC-09):

- 2a1. Employee came from UC-02 with GAD-7 score >=15 (severe).
- 2a2. System triggers extend UC-09 (Emergency Crisis Protocol).
- 2a3. Shows 24/7 crisis helpline banner with booking options.
